DETAILED ACTION

Drawings

1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-56 are rejected under 35 U.S.C. 102 (b) as being unpatentable over the publication of Jun Rekimoto.

As for claims 1, 8, 17, 27, 32, 36, 43, and 52, Jun Rekimoto teaches a display (Fig. 3) and a hand-held electric device, including pagers, and cell phones. Instead of using a pen or a touch sensitive display, there are other possibilities to operate hand-held devices. They are using a tilt as the input method corresponding to a navigation sensor.

As for claims 2-5, Jun Rekimoto teaches that it is possible to control a cursor by tilting while menu items are fixed on the screen. The equation on (column 4, lines 172-26) simultaneously teaches how to control the three effects of viewing transformation like panning,

zooming and rotating corresponding to at least moving a cursor, panning, scrolling and navigating part of said image.

As for claims 6-7, 9-16, 18-26, 28-31, 33-35, 37-42, 44-51, and 53-56, Jun Rekimoto teaches the user controls the location of the cursor and looks around the map by keeping the button depressed and rotating the display left and right, or up and down (Fig. 3).

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
